

Black on the outside Gold on the inside

"Black on the outside and gold on the inside, a mystifying lighting concept that will forever remain in style."

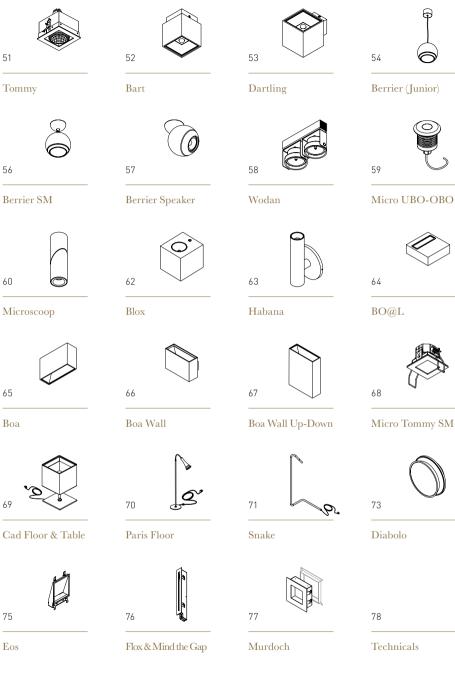

In the beginning there was black. At Interieur 2006, the leading biennial design event in Belgium, TAL laboratories added a touch of gold to a deep black lighting element called DART. The wall-mounted luminaire radiated with an inner golden glow and immersed every interior in a classy and stylish visual splendor. TAL-adepts started making suggestions to transform other lighting fixtures into the blackest gold ever seen. And so, TAL laboratories carried out more experiments resulting in a never before seen collection of lighting elements designed to bathe your interior in a warm and intimate glow.

For exactly eleven years now, TAL has maintained its Black+Gold collection and with each new product, a version in black and gold was developed. The black housing of the products contrasts beautifully to their warm, golden interior. At Euroluce 2017, the international lighting exhibition in Milan, TAL will once again proudly present this trendsetting Black+Gold collection. This time, it will be alternated with lighting fixtures that completely bathe in gold. For example, a version of the BERRIER in 24-carat gold will be presented. TAL's newest addition to the Black+Gold collection will be the DIABOLO, designed by Lieven Musschoot & Cas Moor.

Throughout the range, you will discover attractive fixtures reminiscent of thirties style, of jazz clubs and of royal interiors. With its unique character, the Black+Gold series offers that extra added aesthetic value to both classical and contemporary interiors. Black on the outside and gold on the inside, a mystifying lighting concept that will forever remain in style.

DESIGN BY KAREL FESTJENS

The stylised, transparent suspended luminaire Olijf is made from heatresistant, mouthblown glass in smoky black.

The golden interior serves as the olive's pit in which a beautiful, decorative lamp can be mounted. With its organic shape and artisan look, OLIJF evokes a relaxed, natural atmosphere. OLIJF is the fruit of contemporary design meeting traditional craftsmanship.

As already suggested by its name, Kalebas, designed by Lieven Musschoot & Cas Moor, has the organic shape of a calabash.

This suspended luminaire is part of the DALSGAARD collection; the upper part is made of undulating black oak wood, the lamp housing is executed in magnificent gold. KALEBAS is the ideal lighting fixture for housing LED-lamps with an E27 base as only the light-emitting part is visible and the technical components of the lamp remain hidden behind the housing.

Industrial cosiness

LUZIEN is an ode to industrial design. The perfectly balanced proportions and the rich radiance of the warm light flowing over the golden inside of the luminaire turn LUZIEN into an attractive suspended luminaire with a sophisticated vintage look.

The shape of these suspended luminaires is based on the typical roofs of Saint Basil's Cathedral on the Red Square in Moscow.

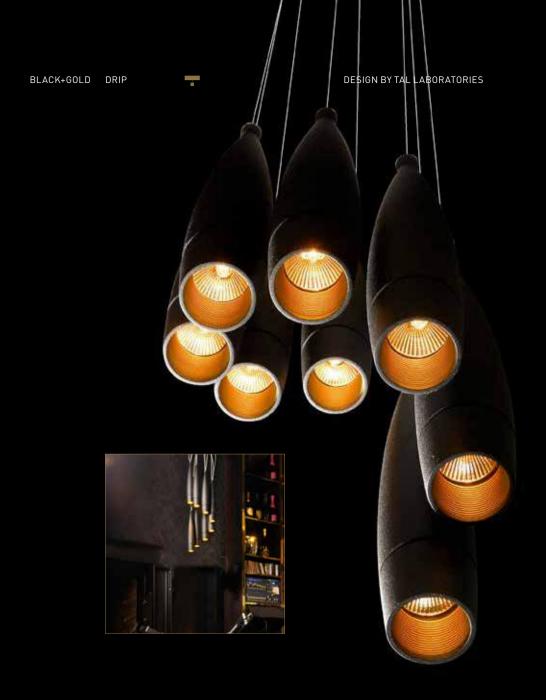

Their attractive, organic and modern shapes can be perfectly combined, evoking a friendly, welcoming atmosphere. DIMITRI and/or KAZAN will create striking accents in your interior.

Drip is a true classic with a contemporary feel.

Drip is an elegant, drop-shaped suspended luminaire and ideally suited for creating a certain atmosphere. Its unique design, an inextricable part of the TAL DNA, is undeniable.

Hood is a playful suspended luminaire.

The trumpet-shaped design provides for a nice accent in modern and trendy interiors and is particularly suited for generating light above a bar, kitchen island or dining table. The gold-coloured interior serves as a reflector immersing the room in a soft and warm atmosphere.

BLACK+GOLD

Visit our website and compose your own King George.

www.tal.be/kinggeorge

In the case of KING GEORGE, only the outlines of a chandelier remain, and all the lighting fits in the design itself. KING GEORGE is a jewel of simplicity, purity and technical ingenuity. In addition to its illuminating quality, a chandelier also has a decorative function and this is very much true for the KING GEORGE, too. A modern or pimped KING GEORGE will add a royal touch to both modern and the more classic interiors.

With its wonderfully slim silhouette, Meryl can compete with the thinnest linear lighting solutions available on the market.

Apart from this spectacular linear design, MERYL is also an exceptionally clean device. Its mounting requires only two suspension cables and the end caps have been seamlessly integrated into the profile. Everyone's attention will be drawn immediately to the beautiful, gold-coloured LED-modules that have been integrated in the black profile.

This stunning piece of modern design was named after the inventor of dynamite, Alfred Nobel.

Despite its minimal dimensions, NOBEL emits plenty of light thanks to the state-of-the-art LED-technology. NOBEL feels best in a minimalist interior and blends in seamlessly with the latest interior design trends.

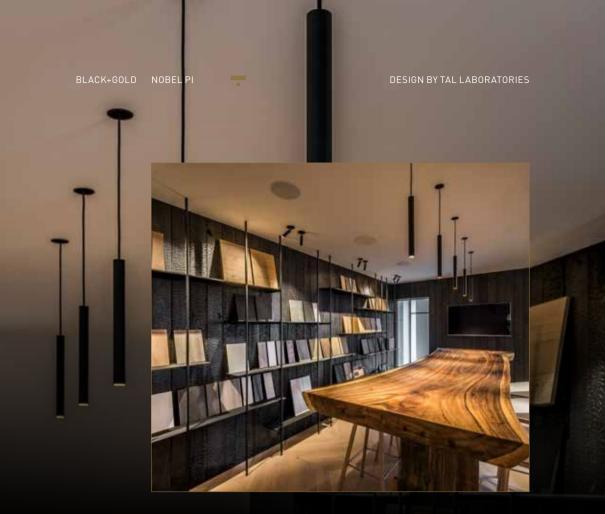

As is the case for its suspended variant, Nobel Elbow is composed of a slim little bar.

This wall- or ceiling-mounted version comes with an articulated arm and can be rotated around its own axis so that it is very easy to direct. Obviously, this small device has all features that are typical of the Think Small. collection of which the NOBEL product line is a part.

NOBEL PI is the longer version of NOBEL SUSP and measures exactly 314 mm, hence the name PI. The NOBEL PI is not only mathematically interesting, its sleek design blends in with every interior. The perfectly balanced proportions between the upper and lower part of NOBEL PI brings peace and harmony into your interior.

RDECO

TAKE PART IN OUR ART

Nelson's functional flexibility make it a perfect tool for adjusting the look of a space according to your own wishes.

NELSON is a lighting fixture from the LAYERS collection, designed by TAL in cooperation with renowned designer Sylvain Willenz. Typical of the luminaires from this collection is their layered character. With the tubular NELSON, you can adjust both the light beam and lighting effect and create a different atmosphere by playing with the different layers of the luminaire.

Comme c'est élégant

The original design of the luminaire PARIS is a playful reference to the symbol of the French capital, the Eiffel Tower. The deeply recessed LED-light source combined with a warm, gold-coloured reflector brings cosiness in any interior.

Roban is a true classic within our product offer.

Its voluptuous, cylindrical shape exudes modernity and is a pleasure for the eye in any interior. ROBAN has a robust, distinctive look that creates visually attractive spaces. The luminaire can be suspended and surface-mounted and be combined with several light sources.

Rollo is a lighting fixture from the Layers collection, designed by TAL in cooperation with renowned designer Sylvain Willenz.

Typical of the luminaires from this collection is their layered character. Also the circular ROLLO reveals its finesse across different layers. The combination of contemporary design and functionality turns ROLLO into an attractive luminaire that is essential for the spatial experience.

With this square-shaped recessed downlight, almost everything is possible: several sizes, round or square installation hole, IP20 or IP54 and a wide choice of light sources. Everything in the same VIP finishing, from frame to interior.

Let it glow.

With its elegant, conical shape, minimalistic trim and set back non-glare light source, Cedrus feels right at home in any interior. Its inconspicuous presence radiates pure style. Cedrus is available for retrofit LED light source or with our state-of-the-art, A++ integral Beaufort LED module which, combined with the gold interior, provides the perfect warm light output.

HOME

DESIGN BY TAL LABORATORIES

These are two key characteristic words for the recessed downlights CLIO and ORION. Both luminaires really come to life in almost any ceiling and their gold-coloured ring immerse every room in a discrete atmospheric glow. The austere design ensures that CLIO and ORION blend in with the style of any interior.

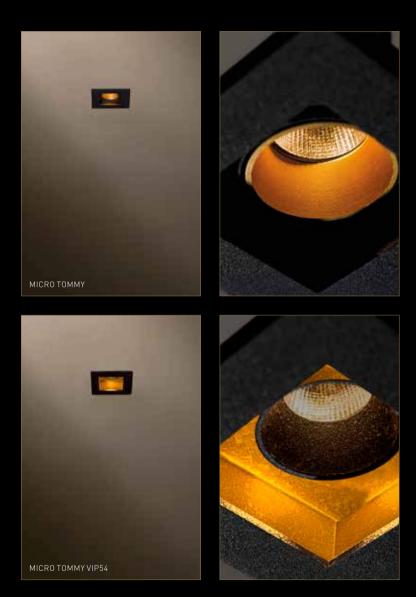

Florian is a round recessed luminaire with flush-mounted LED-module.

This device shows as no other that a recessed spotlight is not only functional but can also provide for a touch of elegance. FLORIAN offers a solution for a wide variety of projects. Think of shops and hotels, but also for private dwellings it is the perfect device. And with the Xicato Artist LED-module it ensures a perfect colour reproduction.

MICRO TOMMY VIP54 is a full-fledged recessed downlight of only 60 by 60 mm and can be used in damp spaces. The clear protective glass covers a LED-module with a central, slightly recessed position.

Micro Tommy VIP54 can be perfectly combined with all other devices from the Micro Tommy product line.

Nuts is a small suspended luminaire with a simple but sublime design combining beauty and technique.

With its simple shape, it can light a room discretely. Combined with a beautiful decorative lamp, the minimalist NUTS luminaire is transformed into a genuine eye-catcher.

Discreet presence

With its deeply recessed light source, SPINA forms one whole with the ceiling, spreading a cosy, glare-free light. Now also available with integrated Haloled technology. This recessed spotlight can be perfectly combined with the surface-mounted variants SPINA ON and SPINA ELBOW.

Cylindrical purity

SPINA ON is the surface mounted version of the downlight SPINA and has the same set-back light source. The SPINA family is thus a complete set of products containing downlights, pendants and (orientable) ceiling mounted luminaires which can be combined with one another.

Restrained flexibility

As with its built-in counterpart, the light source of SPINA ON ELBOW is deeply recessed, thus preventing any glare. The screwless joint ensures excellent manoeuvrability. The new version with integrated Haloled is standardly delivered in a dimmable version.

Spinola is a suspended luminaire.

Its design is based on SPINA PENDANT but with a distinctive elegant touch, enabling you to create a magical, sensual atmosphere in your modern interior. Put your interior into the spotlights with this beautiful eye-catcher.

Micro Incas is the tool of choice to connect light and space, an incredibly small luminaire for trimless incorporation into the ceiling.

MICRO INCAS contains three separately adjustable LED-modules. The inside of the housing can be painted in the same colour as the ceiling to obtain a clean, taut finishing. With MICRO INCAS, you can – discretely yet strikingly – compose the light in your space according to your own specific wishes.

Thor's characteristic shape ensures maximum versatility.

Whether it is for a comfy lounge, a cosy coffee corner or a trendy kitchen, the luminaire always provides for a stylish touch without losing sight of functional efficiency. The combination of a QT12-lamp and a golden anodised reflector in a housing in deep black creates a warm, inviting atmosphere. The classic THOR is also available in a THOR TWIN execution.

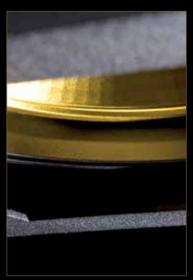

MINI TOMMY BEAUFORT is a classic downlight within our offer. The ingenious Beaufort modules now have a golden finish that makes that the luminaires beam with pride. MINI TOMMY BEAUFORT is beauty combined with power.

TOMMY QT12 is also a member of the comprehensive TOMMY range and at the same time a bit of an outsider because of the traditional halogen light source. Still, there is no way around it. The combination of sparkling halogen light and a golden reflector with a light beam of 24° generates a distinctive golden radiance immersing your interior in a pleasant warm atmosphere.

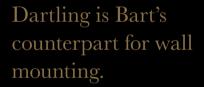

Bart is a ceiling-mounted luminaire with an attractive geometrical design.

The light follows a gently sloping path over the gold-coloured reflector, flush-mounted into the rectangular luminaire. The austere design of the luminaire BART lends structure to any space.

Both luminaires have a unique, gold-coloured reflector, flush-mounted into the rectangular luminaire. The built-in LED-module casts a beautifully defined light beam onto the wall. With its attractive modern design, DARTLING appears as a striking accent in any interior.

Timeless design

For BERRIER and its little brother BERRIER JUNIOR, TAL reverted to a timeless, round design, taken to the next level by finishing it off with a spherical, glass lens. The combination of the black powder-coated housing and the golden ring in anodised aluminium is truly astonishing. Meanwhile, we've also created BERRIER SPEAKER, a beautifully designed full-range speaker in the same style as the surface-mounted version of the BERRIER luminaire. The luminaires from the BERRIER product line are stylish eyecatchers creating a warm and cosy atmosphere.

Elegant versatility

With its screwless design and rounded forms, WODAN takes every interior to the next level. This Jack-of-all-trades is available as ceiling- and wall-mounted device, as suspended luminaire, track-mounted spotlight and even as a freestanding floor model.

Micro Ubo/Obo are the smallest members of TAL's series of floor spotlights.

With a diameter of only 55 mm, these floor spotlights are very small devices delivering great performances. Like the rest of our floor spotlights, MICRO UBO/OBO have degree of protection IP67. These tiny floor spotlights are thus suited for both indoor and outdoor applications and can create a cosy atmosphere in entrance halls or on driveways, terraces or patios. Gardens that are illuminated by these tiny little spotlights immediately invite to an enjoyable evening walk.

Microscoop is a beautifully stylised, directional luminaire that feels at ease in any interior.

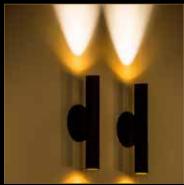

MICROSCOOP is a beautifully stylised, directional luminaire that feels at ease in any interior. From a restaurant over a beauty salon up to your own bedroom, this all-rounder can be used anywhere. MICROSCOOP fulfils all your wishes. It is compact and elegant, timeless and refined.

Habana is a wall-mounted fixture from the Think Small. collection.

The luminaire can emit a cosy indirect light, upwards, downwards or even both. The possibilities of this extremely compact wall-mounted fixture are endless. The cigar-shaped luminaire has a subtle design but a powerful light output.

Simplicity. The BO@L blends with almost every interior and is ideal to be combined with other products of the BOA family.

The BO@L is a discrete wall fitting that combines minimalistic lines with an outstanding performance. The gentle, warm light effect of the BO@L, offering a pure indirect light on the wall, makes this fixture the perfect solution for every home & hospitality project, and even for office & retail applications. The BO@L features an efficient LED system with a very broad light beam. The gear is incorporated for easy installation on the wall.

Beam shaped wall luminaire with integrated LED system.

BOA is one of the many surface mounted luminaires that can be perfectly combined with other TAL products.

BOA, BOA WALL and MICRO TOMMY 3 SURFACE all share the same design language. BOA is featured by a modern, austere housing without visible screws. The dimensions are identical so that the combination of these appliances results in a sublime overall look.

This wall-mounted luminaire reflects perfectly what TAL stands for.

As a member of the Think Small. collection, MICRO TOMMY 3 CEILING offers truly compact LED-power. Three adjustable LED-light sources, gathered in a minimalist housing, offer a combined light intensity of 1200 lumen. The luminaire can be connected directly to a 230V power supply and after its mounting, no screws whatsoever are visible.

Luxurious elegance.

CAD TABLE and CAD FLOOR are two stand-alone light fittings that simply radiate elegance. Seamlessly manufactured, luxuriously coated and containing a gold anodized reflector change simple light into a luscious warm glow. With their austere, timeless design, CAD TABLE and CAD FLOOR perfectly blend into any interior.

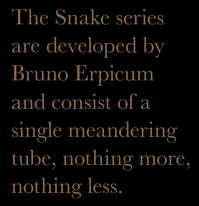

Flexible ambiance

The cosmopolitan design of the suspended luminaire PARIS is resumed in this freestanding floor lamp. Flexibility and atmosphere are the operative words here. The luminaire can be moved, is fully directional and is delivered with a foot switch, ready for plugging in. Obviously, it can be perfectly combined with the suspended variant of the PARIS product line.

Free-standing lighting elements traditionally consist of a lamp, lamp post, foot piece and cable. Bruno Erpicum reduced all those elements to one single smooth line whereby simplicity is key. The meandering tube indeed takes care of all aspects a lightning fixture requires, stability, aesthetic elegance and of course the pure function of ... light.

The Diabolo is an elegant wall fixture with a simple yet diabolic shape.

The DIABOLO Gold is plated with 24K gold, which accentuates its nice round shapes. The applications are endless from indoor atmospheric lighting, orientation lighting and nightlight. The DIABOLO is also the ideal product for hotel projects, cinemas, etc... and with, for example, a room number, it doubles as an illuminated sign. The DIABOLO fits on a standard round wall box so installing the fixture is a piece of cake.

Golden indirect ambient light.

Thanks to the golden asymmetrical reflector, the EOS is the ideal fixture to bring a golden glow into the interior. The EOS can be installed in the wall just above eye level in order to wall wash the ceiling, providing indirect ambient light with a golden glow. When installed at a lower height, the EOS can be used as orientation light or to illuminate circulation paths.

Subtle intervention

FLOX & MIND the GAP are subtle wall-recessed luminaires creating a harmonious and elegant connection with the surrounding space. MIND the GAP is a slim light-emitting recess whereas FLOX is the somewhat wider variant. Both lighting fixtures cast a soft and discreet light beam. The combination of black with a golden inner surface creates an extra warm effect.

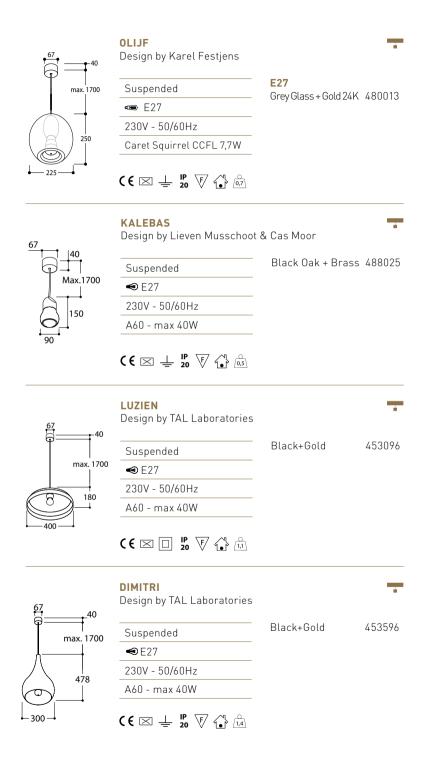

Golden canvas for warm cosy atmosphere.

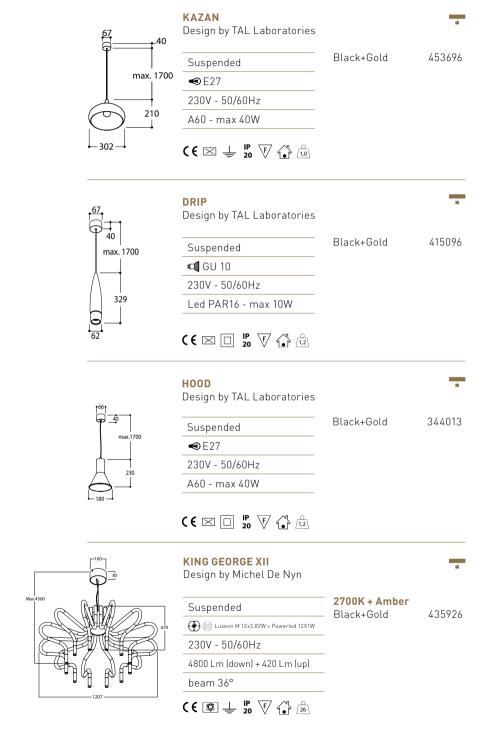

atmosphere.
The MURDOCH is a recessed wall fixture which distributes the light in an indirect way into the interior. The LED light is first projected on the golden canvas and will then be reflected in the open space, where it can spread its golden shine. The timeless design of the MURDOCH gives it a very sleek and subtle

appearance which is suited in almost all kind of interiors.
